# LANGTON

CATTLE CO

THE BLOOD THAT BREEDS

"Langton Cattle Co. runs a carefully structured breeding programme that combines the most successful Kenyan and South African lines with locally adapted genetics. The result is a superior, hardier animal that can elevate any cattleman's herd."

*Colin Langton*

## OUR LINES...

**CARINUS**

"Buffel"

"Caesar"

2459

**ABNER**

Strong masculinity. Thick-set, well-muscled & early maturing.

**JT: A 717 son**

"717"

717

**11 - 43: A line-bred 717**

Bulls with a wide top line & fertile females with great capacity.

**16 - 4: A 2 + 3**

"Forrester"

KEN

**MASVINGE**

Locally-adapted genetics from Kenya's top herds: Segera, Mogwooni, Ol Pejeta, Solio & Mutara. A herd closed for almost three decades.

*THE BLOOD THAT BREEDS*

GENETICS

ADAPTATION

REGENERATION

We run our breeding programme according to 3 key pillars:

**1. We focus on proven genetic lines.**

Meticulous research and the sourcing of proven lines to build our herd is taking us towards a goal of fertility and adaptability.

**2. We focus on animals that are locally adapted.**

Harsh sourveld conditions combined with a tough herding and night-camping system means that we choose medium-framed, early-maturing animals with capacity.

**3. We focus on regeneration.**

Carefully planned planting of covercrops combined with the strategic use of night camps brings about regeneration of the land and increased profits to our mixed enterprise.

| <b>Comments:</b> MC120071 is a proven herd sire for Langton Boran Stud, out of the Buffel (TLM02-1) line . A bull with great length, muscling, testes and mobility. His sheath is very corrective for those looking to tidy up in that area. He has bred very well for us over the past five years, with an example of a son on sale today 17-0003L. His heifers are feminine and fertile. Current Scrotal circumference 45cm. |       |      |            |            |      |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |       |          |            |           |      |            |

| <b>Comments:</b> 15-0037HHB is a lovely white cow with good width and an excellent udder. Her heifer calf 20-0106HHB is out of MC120012 who has very unique genetics. Her Sire 09-0034HHB is a very hardy, strong, wide and heavily muscled bull with a good libido and temperament. 09-0034HHB's Sire 02-0021FE is bred out of the Grand Champion Sire 93-0040FE (Masai). His Dam 02-0008FE is a short wide, well muscled fertile cow. 02-0008FE was in our herd until she was 18 years old. |       |      |        |            |           |            |

| <b>Comments:</b> 18-0136HHB is of total South African genetics, out of the renowned Jodan and Adelson Studs. He is an early maturing grey bull, with very correct conformation, excellent sheath and testicles. 18-00136HHB can be used on cows with big Navel Flaps to help correct this in her progeny. Current SC is 41cm. |       |       |       |            |           |            |

| <b>Comments:</b> MC120074 is another proven herd sire for Langton Boran Stud. He comes out of the Ramaphosa (KPO1017) line and shows all the typical Boran characteristics. His testes and sheath are excellent, he is tough and has given us great heifers in our upgrading program. Current Scrotal circumference 44cm. |       |      |            |            |      |            |

| <b>Comments:</b> 18-0287HHB has a lovely slick coat, excellent large testicles and sheath. He has a good temperament. His Sire MC120012 is a larger masculine South African Boran bull full of Kenyan genetics. He has large testicles and a good underline. His muscling and width are second to none, they are in proportion to his larger frame. Current SC is 38cm. |       |       |       |            |           |            |

| <b>Comments:</b> 16-0039HHB is a very feminine red appendix SP cow with a lovely slick coat and great capacity. Her heifer calf 20-0122HHB is out of the very well muscled MC120012, this is a pair of Boran excellence. 16-0039HHB's Sire 09-0034HHB, is a very hardy, strong, wide and heavily muscled bull with a good libido and temperament. His Sire 02-0021FE is bred out of the Grand Champion Sire 93-0040FE (Masai). His Dam 02-0008FE is a short wide, well muscled fertile cow. 02-0008FE was in our herd until she was 18 years old. |       |      |        |      |            |            |    |

| <b>Comments:</b> 14-0036HBB is polled. She has a good udder, slick coat and fine bones. Her heifer calf 20-0059HBB is an appendix A (50% Boran and 50% Beefmaster) who is showing extreme hybrid vigour. Her Sire, 10-0027HBB is a deep well muscled red bull. HAVE' used him at the early age of 2 years old. His Sire, 04-0054FE was very strong and his Dam, 07-0021HBB is still in our herd at 14 years old. Dam involved in our Embryo Program. |       |       |        |       |            |            |       |

| <b>Comments:</b> 15-0009HHB is a lovely fertile appendix A cow (50% Boran and 50% Mashona). Her heifer calf 20-0227HHB is sired out of MC120146. 15-0009HHB's Sire 09-0034HHB, is a very hardy, strong, wide and heavily muscled bull with a good libido and temperament. 09-0034HHB's Sire 02-0021FE, is bred out of the Grand Champion Sire 93-0040FE (Masai). His Dam 02-0008FE is a short wide, well muscled fertile cow. 02-0008FE was in our herd until she was 18 years old. Dam involved in our Embryo Program. |       |          |        |            |           |            |
